Creating Caring and Confident Learners

Friday 16th July 2021

Dear Andrew and Cathryn,

I am writing to say how happy we are that we selected to go with Aquaculture Advantage for our schools' aquaponics system. Despite the fact we were in the first period of COVID issues in 2020 you both provided exceptional service to install the system and train our staff on its use. One year has now passed and our Silver Perch are growing nicely with NFT and the grow beds producing some magnificent vegetables. The aquaponic system has complimented our teaching and learning programs providing a real-world basis for curriculum offerings. There is a continued buzz of enthusiasm from both the students and the community as well as wondering when they get to put the fish on the grill. Thanks for your continuing support.

Regards

Greg Edwards

Principal
